Aditi Kela

Seattle, WA | aditikela0@gmail.com | linkedin.com/in/kelaaditi | aditi-kela.vercel.app

PROFESSIONAL SUMMARY

3+ years of experience leading cross-functional delivery in banking risk and compliance and manufacturing operations. Aligns engineering, quality and product teams, sets priorities with RICE and MoSCoW, and takes work from requirements through change control and release. Automates manual work with generative AI, Power Automate and Microsoft Copilot, and gives the C-suite on-demand visibility into progress and risk. Also designs and builds application prototypes, from user research to working apps.

PROFESSIONAL EXPERIENCE

Grifols Biologicals **Jun 2026 - Sep 2026**

Project Management Intern, Operational Excellence *Los Angeles, CA*

- Owned cross-functional alignment for program changes across 4 teams (Engineering, Quality, Validation and Environmental), using Smartsheet to keep owners, milestones and dependencies in sync.
- Cut weekly reporting preparation from roughly 1 working day to 1 hour by automating meeting notes with Microsoft Copilot, capturing action items and owners across Excel and Word for review before sharing.
- Built a KPI dashboard that gives the C-suite on-demand visibility into shutdown planning, execution, area release, issues and risks, and the daily shutdown log.
- Drove requirements, design and testing with Engineering and QA, running a Kanban board to track delivery and linking each requirement to a test.

RBL Bank **Jul 2022 - Jun 2025**

Program Manager, Risk and Compliance *Mumbai, India*

- Automated risk and impact assessments with generative AI for product teams shipping consumer software, cutting assessment time from 3 working days to 3 hours while keeping regulatory checks and approval controls in place.
- Replaced rule-based Excel guideline checks with a machine learning workflow that flags applicable Reserve Bank of India (RBI), national and international guidelines, reducing the error rate by 20%.
- Wrote business requirements and ranked engineering requests with RICE and MoSCoW, then coordinated change control through production release.
- Worked cross-functionally on 8 major and 10 minor releases over 3 years; for the mobile app version 2 launch, provided risk assessments, policy documentation and compliance dashboards.
- Built 3 Power BI dashboards for C-suite risk reporting on SQL-validated data, and automated 6 recurring reports with Power Automate and UiPath, cutting each cycle from 2 days to 4 hours.
- Wrote IT policies and control standards aligned to RBI and NPCI guidelines, and maintained the IT risk register by impact and likelihood.

PROJECTS

HelpDesk | Service Request Prototype | Live prototype | helpdesk001.vercel.app

- Defined the workflow, requirements and delivery plan for a prototype that routes each request to the responsible team with visible status; demonstrated with sample data.

BabySteps | AI Parenting App | Figma, Claude API, speech-to-text

- Designed the app in Figma and developed it with the Claude API and speech-to-text so guidance adapts to the parent's country; presented at Northeastern Expo 2026.

Dental Clinic App | Patient Records and Billing | Swift (iOS) | Live

- Built an iOS app used by about 5-6 people at a dental clinic to store patient records, track returning patients and manage invoices.

TravelScout | Group Travel Planning Chatbot | In development

- Conducted user research and scoped personalized itineraries, friend connections and group polls.

NuCampus360 | Emerald Forge Hackathon, Northeastern University | Mar 2026

- Presented an AI campus guide with chatbot functionality.

SKILLS

Product: User research, requirements analysis, prioritization (RICE, MoSCoW), Figma
Project and program: Stakeholder coordination, schedules and dependencies, risk and issue tracking, change control, release coordination, Agile, Kanban, C-suite reporting
Tools and technical: Excel, Power BI, SQL, Smartsheet, Microsoft Copilot, Power Automate, UiPath, Swift (iOS)

EDUCATION

M.S., Information Systems | Northeastern University, Seattle, WA | GPA 3.92 **Sep 2025 - May 2027 (expected)**
Coursework: Business Analysis, Advanced Business Analysis, Applied Engineering Management

B.Tech, Computer Science | MKSSS Cummins College of Engineering for Women, India **Aug 2018 - May 2022**
